

# Seminários CGE/UE

**Hora:** 14:00  
**Data:** 20 de Junho de 2007  
**Local:** Anf. 1 – Col. Luís Verney  
**Promove:** Centro de Geofísica de Évora

## **SEISMICITY OF *AL HOCEIMA* REGION IN RELATION TO ITS GEOTHERMAL CONTEXT**

**Prof. Abdelkrim RIMI<sup>1</sup> e Prof. Yassine ZARHLOULE<sup>2</sup>**

<sup>1</sup>Director do Departamento de Física do Globo, Instituto Científico - Rabat

<sup>2</sup>Departamento de Geologia, Faculdade de Ciências, Universidade de Oujda

### **Resumo**

Seismic activity in Al hoceima region is interpreted in connection with the geophysical and geological contexts of the Rif: Geothermal data, crustal thinning, tectonic, volcanism, hydrodynamism, electrical conductivity and magnetic anomalies, density).
